PROFILE SUMMARY

DevOps-focused Computer Science Engineering graduate with hands-on experience across the full DevOps lifecycle — cloud infrastructure (AWS), containerization (Docker, Kubernetes), CI/CD automation (Jenkins), Infrastructure as Code (Terraform), and GitOps delivery (Argo CD). Experienced in deploying and troubleshooting applications on Amazon EKS, including resolving real-world networking, IAM, and Kubernetes RBAC issues. Comfortable with monitoring and observability (Prometheus, Grafana), security practices (RBAC, secrets management), and Linux/Git-based workflows. Currently building production experience through a hands-on DevOps internship, with a strong foundation for roles spanning cloud infrastructure, automation, and site reliability.

ACADEMIC QUALIFICATION

Bachelor of Technology (CSE - AI&ML) CGPA: 7.39 November 2022 – June 2026

G Pulla Reddy Engineering College, Kurnool

Higher Secondary School (12th Grade) Score: 70.7% April 2021 – June 2022

Narayana Junior College, Anantapur

SKILLS

- **Programming:** Python, Java, Bash
- **Cloud Platforms:** AWS (EC2, IAM, VPC, S3, EKS, ELB, Auto Scaling, RDS, SNS, Route 53)
- **Containers & Orchestration:** Docker, Kubernetes, Helm
- **CI/CD Pipeline:** Jenkins, Argo CD, GitHub, GitOps
- **Infrastructure as Code (IaC):** Terraform
- **Monitoring & Observability:** Prometheus, Grafana, AWS CloudWatch
- **Security & Quality:** SonarQube, Trivy, Kubernetes RBAC
- **Version Control:** Git, GitHub
- **Operating System:** Linux Administration
- **Reliability & Operations:** Troubleshooting, Incident Analysis, High Availability, Auto Scaling, Load Balancing, Monitoring & Alerting
- **Methodologies:** Agile (Scrum)

PROJECTS

3-Tier Node.js Application Deployment on AWS EKS | [GitHub](#)

- Containerized and deployed a Node.js application through an end-to-end pipeline (Docker → Jenkins → Amazon ECR → Terraform → EKS), progressing from Docker Compose testing on EC2 to full Kubernetes deployment.
- Built a Jenkins CI/CD pipeline automating build, test, Docker image creation, and push to Amazon ECR, followed by automated deployment to EKS.
- Configured Kubernetes RBAC, Secrets, HPA, and Pod Disruption Budgets, and exposed the application externally via AWS Load Balancer, integrating MongoDB Atlas, Mapbox, and Cloudinary for database, mapping, and image storage functionality.
- Debugged and resolved deployment failures across MongoDB connectivity, IAM permissions, Kubernetes RBAC, and Jenkins-to-Kubernetes authentication.

GitOps-Based Continuous Delivery with Argo CD | [GitHub](#)

- Implemented GitOps-based continuous delivery using Argo CD, automatically syncing Kubernetes manifests from GitHub and deploying applications to an existing Amazon EKS cluster.
- Deployed and managed Kubernetes resources including Deployments, StatefulSets, HPA, Ingress, ConfigMaps, Secrets, PVs, and Network Policies through Argo CD sync.
- Configured Argo CD sync policies (auto-sync, self-heal) to maintain cluster state consistency with the Git repository.

AWS Multi-AZ Infrastructure — Auto-Scaling PHP Application Deployment | [GitHub](#)

- Designed a 3-tier AWS architecture across 2 AZs using VPC, public/private subnets, route tables, IGW, NAT Gateway, EC2, and RDS; troubleshot EC2-RDS connectivity and configured network security.
- Configured ALB with Auto Scaling (min 2 – max 4 instances), CloudWatch, and SNS to enable scalable application delivery, infrastructure monitoring, and alerting.

INTERNSHIPS

Davine Technologies — DevOps Intern (August 2026 – Present | Remote)

- Working with DevOps practices including Linux, Git, Docker, Jenkins, and CI/CD pipeline implementation.
- Contributing to application build, testing, containerization, and deployment automation while following industry-standard DevOps practices.

Global Quest Technologies, Yelhanka - Bangalore — Java Developer Intern (December 8, 2025 – April 19, 2026)

- Completed hands-on training in Java, covering OOP, Collections, and JDBC
- Worked on live codebase bug fixes, regression testing, and participated in Agile sprint activities and peer code reviews

CERTIFICATIONS & LEARNING

- AWS Cloud Practitioner Essentials – AWS
- LLM Fundamentals — Currently Learning
- Programming in Python — SWAYAM | Dibrugarh University
